

Summary of Highway Product Evaluation Practices and HITEC Needs Survey

Filesize: 4 MB

Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

SUMMARY OF HIGHWAY PRODUCT EVALUATION PRACTICES AND HITEC NEEDS SURVEY

American Society of Civil Engineers. Hardback. Book Condition: new. BRAND NEW, Summary of Highway Product Evaluation Practices and HITEC Needs Survey, Highway Innovative Technology Evaluation Center, This report (CERF No. 94-5012) contains the results from a survey conducted by the Civil Engineering Research Foundation (CERF), the research affiliate of the American Society of Civil Engineers. CERF conducted this survey of the highway community to assess: existing systems, facilities, procedures, and practices for evaluating and introducing new technologies into the highway community; the needs and expectations of the highway user community and those organizations interested in marketing new highway technologies; and the potential acceptability and usefulness of the Highway Innovative Technology Evaluation Center (HITEC). Survey data were collected from three broad categories within the highway construction community: users of innovative products; entrepreneurs, including inventors, developers, and marketers of highway innovations; and research institutes and private testing and evaluation laboratories. This report provides a summary of existing new product evaluation activities, and policy/technical guidance to plan and operate HITEC.
