010 Uitgeverij, Netherlands, 2013. Paperback. Book Condition: New. 222 x 166 mm. Language: English . Brand New Book. Flying Lightness paints a picture of a heroic century of aircraft development against the background of steadily increasing travel speeds. Since the Wright brothers made their first brief flight over 100 years ago, aircraft construction seems to have become stuck in a rut. Today, rapid advances in the field of composites are opening up new possibilities for optimizing aircraft configurations and revising structural principles. Composites are combinations of two or more physically distinct materials that enhance each other's properties. The new modes of system integration and improved structural quality they offer may even produce a 30 percent more efficient blended wing passenger plane. Flying wings, once just a footnote in the history of air transport, could well become the aircraft of the 21st century. Best Dutch Book Design 2005.
