TECHNOLOGY TRANSFER TO DEVELOPING COUNTRIES: THE INTERNATIONAL TECHNOLOGICAL GATEKEEPER (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Technology Transfer to Developing Countries: The International Technological Gatekeeper A questionnaire was developed and administered to the research personnel of An Foras Taluntais, the Irish agricultural research and development organization, to study the operation of communications channels for the international transfer of technological information. The techniques employed are consistent with those used in previous studies of the purely domestic flow of technological information into American research and development laboratories. Results of the study show that the international transfer, like domestic transfer, takes place in a two-step process operating through certain intermediary agents called technological gatekeepers. These technological gatekeepers must be well integrated into two information networks, an external network of information sources and an internal network of users to whom the information can be delivered. Possible strategies for gatekeeper development are discussed. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
