

Mathematical and Physical Science Volume 81

Filesize: 4.06 MB

Reviews

This ebook will never be effortless to get started on studying but extremely fun to read through. It is actually written in easy phrases and never difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Pearl Corwin)

MATHEMATICAL AND PHYSICAL SCIENCE VOLUME 81

DOWNLOAD

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 edition. Excerpt: .cylinder, or the functions considered by Sturm in connection with the conduction of heat, by Thiele and Charlier in reference to probability, and by Hermite.f The two-dimensional functions seem to be new, but they are shown to be the equivalent in polar co-ordinates of the functions considered by Hermite $(d/dx)(d/cy) e^{-l+3}$ and the relations connecting the two types of function are obtained. It is shown in the paper that any function of x and ϕ can be expanded in the form $22a \sin m\phi \cos 7116$, where $(-)\gamma_{ran}$, $m = \text{fforn}(\phi \text{ mcom} 6dx\phi, \text{Jo Jo and a proof of the convergence and validity of the expansion is given in the case where } \phi \text{ is independent of } \phi, \text{ with an indication of the extension to the general case. Hence a series is obtained giving a solution of the equation Liouville, I and II. + Comptes Rendus, vol. 58. } V2w = dujdt, \text{ which reduces for } t = ta \text{ to a function given all over the plane, viz.: } --, m(\phi/4\phi) \cos m\phi, \text{ the coefficient } a, h \text{ m being obtained as above. This series is shown, by direct expansion, to be equivalent to Laplace's definite integral solution of the cooling of an infinite plate, viz., Various other expansions are given analogous to Neumann's expansions of } J_n(r^2+p-2rp \cos \phi) \text{ in a series of Bessel functions. The last part of the paper considers the equivalent functions in Cartesian co-ordinates, in terms of which Hermite has...}$
