Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, altered the way I believe.

Eamon Dolan/Mariner Books, United States, 2015. Paperback. Book Condition: New. Reprint. 203 x 137 mm. Language: English . Brand New Book. Chilling . . . Extraordinary and urgent. Washington Post Scary but well documented . . . A deep dive into the world of cyber war and cyber warriors. Los Angeles Times Unsettling . . . A deeply informative account of how corporations, governments, and even individuals are rapidly perfecting the ability to monitor and sabotage the Internet infrastructure. Christian Science Monitor The wars of the future are already being fought today. The United States military currently views cyberspace as the fifth domain of warfare (alongside land, air, sea, and space), and the Department of Defense, the National Security Agency, and the CIA all field teams of hackers who can, and do, launch computer virus strikes against enemy targets. As recent revelations have shown, government agencies are joining with tech giants like Google and Facebook to collect vast amounts of information, and the military has also formed a new alliance with tech and finance companies to patrol cyberspace. Shane Harris offers a deeper glimpse into this partnership than we have ever seen before, and he explains what the new cyber security regime means for all of us who spend our daily lives bound to the Internet and are vulnerable to its dangers. is superb . . . Rigorous, comprehensive, and a joy to read. Lawfare.
